The Journal of Rheumatology is a monthly international serial edited by Earl D. Silverman featuring research articles on clinical subjects from scientists working in rheumatology and related fields.
Positive Patients with Early RA Activity and Physical Disability in Untreated, Anti-CCP-MBL Gene Polymorphisms Are Associated with Disease

TNF Blockade in Patients with Active RA

Circulating Leptin and Adiponectin Concentrations During Parameter for Estimating Joint Space Widths in RA

Implementation of Z-Scores as an Age- and Sex-independent

VOLUME 36: NO. 4 APRIL 2009

from Concomitant RA in Patients with Chronic HBV Infection

Anti-CCP Antibodies Distinguish HBV-associated Arthropathy

Measures of Anti-CCP Antibodies in Predicting Future RA

Association of Polymorphisms in IRF5 Gene with RA:

A Metaanalysis

IRF5 Gene with RA:

Increasing IL-1

IL-17 Increases the Expression of TLR-2, 4, and 9 by Increasing IL-1β and IL-6 Production in Autoimmune Arthritis

Anti-Cyclic Citrullinated Peptide in Preclinical Rheumatoid Arthritis: Food for Thought

Pulmonary Arterial Hypertension in Systemic Sclerosis: Can We Predict Responders for Successful Therapy?

Should Rheumatologists Retain Ownership of Fibromyalgia?

Reviews

Fibromyalgia Wars F. Wolfe

Explaining Medically Unexplained Symptoms: Widespread Pain H.A. Smythe
