

Arkachaisri T, Pino S. Localized Scleroderma Severity Index and global assessments: A pilot study of outcome instruments. *J Rheumatol* 2008;35:650-7. In the Materials and Methods, page 651, paragraph 3, left column, should read, "The most severe or highest scores of each domain (SA, ER, ST, and N/E) of lesions in a given anatomic site are summed to obtain the LoSSI." We regret the error.
