The Journal of Rheumatology is a monthly international serial edited by Earl D. Silverman featuring research articles on clinical subjects from scientists working in rheumatology and related fields.
Editorials

Are Physician-derived Joint Counts Obsolete? .......................... 883
Mismatch Between Skills of Patients and Tools in Use: Might Literacy Affect Diagnoses and Research? .......................... 885
The Challenges of Quantifying the Risk of Serious Infection with Tumor Necrosis Factor Antagonist Therapy .......................... 887
Atherosclerosis in Rheumatoid Arthritis: What to Look For in Studies Using Carotid Ultrasound .......................... 890

Review

More Night Than Day — Circadian Rhythms in Polymyalgia Rheumatica and Ankylosing Spondylitis .......................... 894

Articles

Genetic Variations in Genes Encoding RANK, RANKL, and OPG in RA: A Case-Control Study .......................... 900
Multiplex Screening of 22 SNP in 7 Toll-like Receptors: An Association Study in RA .......................... 905
Decreased Circulating CD28- T Cells in Patients with RA Treated with Abatacept Are Correlated with Clinical Response .......................... 911
Efficacy and Safety of Retreatment in Patients with RA with Previous Inadequate Response to TNF Inhibitors: Results from the SUNRISE Trial .......................... 917
Observational Studies of Infections in RA: A Metaanalysis of TNF Antagonists .......................... 928
Reproducibility of Joint Swelling Assessments in Long-lasting RA: Influence on Disease Activity Score-28 Values (SEA-Repro Study Part I) .......................... 932
Reproducibility of Joint Swelling Assessment by Sonography in Patients with Long-lasting RA (SEA-Repro Study Part II) .......................... 938
Relationship Between Arterial Stiffness and Stanford HAQ Disability in RA Patients without Overt Arterial Disease .......................... 946

Risk Factor Profiles for Atherosclerotic Cardiovascular Disease in Black and Other Africans with Established RA .......................... 953
Health Literacy Predicts the Discrepancy Between Patient and Provider Global Assessments of RA Activity at a Public Urban Rheumatology Clinic .......................... 961
Cytokine Profiles of Macrophage Activation Syndrome Associated with Rheumatic Diseases .......................... 967
White-matter Volume Reduction and the Protective Effect of Immunosuppressive Therapy in SLE Patients with Normal Appearance by Conventional MRI .......................... 974
Phenotype-Haplotype Correlation of IRF5 in SSC: Role of 2 Haplotypes in Disease Severity .......................... 987
Early Detection of Cardiac Involvement in SSC Assessed by Tissue-Doppler Echocardiography: Relationship with Neurohormonal Activation and Endothelial Dysfunction .......................... 993
ILD Associated with Anti-PM/ScI or Anti-Aminoacyl-tRNA Synthetase Autoantibodies: A Similar Condition? .......................... 1000
Estimating Indirect Costs in Primary Sjögren’s Syndrome .......................... 1010
Lack of Association Between the rs6920220 (G/A) Polymorphism of the 6q23 Region and Biopsy-proven Giant Cell Arteritis .......................... 1020
Minimally Important Difference for Patient-reported Outcomes in Psoriatic Arthritis: Health Assessment Questionnaire and Pain, Fatigue, and Global Visual Analog Scales .......................... 1024
Serum Calprotectin as a Marker for Disease Activity and Severity in Adult-onset Still’s Disease .......................... 1029
Patient-derived Joint Counts Are a Potential Alternative for Determining Disease Activity Score .......................... 1035
