*The Journal of Rheumatology* is a monthly international serial edited by Earl D. Silverman featuring research articles on clinical subjects from scientists working in rheumatology and related fields.
Results from the SUNRISE Trial

Values (SEA-Repro Study Part I)

Long-lasting RA: Influence on Disease Activity Score-28 with Previous Inadequate Response to TNF Inhibitors: Disability in RA Patients without Overt Arterial Disease

Infection with Tumor Necrosis Factor Antagonist Therapy: Might Literacy Affect Diagnoses and Research?

Reproducibility of Joint Swelling Assessments in Studies Using Carotid Ultrasound

Atherosclerosis in Rheumatoid Arthritis: What to Look For in Patients Treated with Abatacept Are Correlated with Clinical Response

Efficacy and Safety of Retreatment in Patients with RA Treated with Abatacept Are Correlated with Clinical Response

Decreased Circulating CD28- T Cells in Patients with RA With Previous Inadequate Response to TNF Inhibitors: Results from the SUNRISE Trial

Observational Studies of Infections in RA: A Metaanalysis of TNF Antagonists

Reproducibility of Joint Swelling Assessments in Long-lasting RA: Influence on Disease Activity Score-28 Values (SEA-Repro Study Part I)

Reproducibility of Joint Swelling Assessment by Sonography in Patients with Long-lasting RA (SEA-Repro Study Part II)

Relationship Between Arterial Stiffness and Stanford HAQ Disability in RA Patients without Overt Arterial Disease

Risk Factor Profiles for Atherosclerotic Cardiovascular Disease in Black and Other Africans with Established RA

Health Literacy Predicts the Discrepancy Between Patient and Provider Global Assessments of RA Activity at a Public Urban Rheumatology Clinic

Cytokine Profiles of Macrophage Activation Syndrome Associated with Rheumatic Diseases

White-matter Volume Reduction and the Protective Effect of Immunosuppressive Therapy in SLE Patients with Normal Appearance by Conventional MRI

Phenotype-Haplotype Correlation of IRF5 in SSC:

Role of 2 Haplotypes in Disease Severity

Early Detection of Cardiac Involvement in SSC Assessed by Tissue-Doppler Echocardiography: Relationship with Neurohormonal Activation and Endothelial Dysfunction

ILD Associated with Anti-PM/ScI or Anti-Aminoacyl-tRNA Synthetase Autoantibodies: A Similar Condition?

Minimally Important Difference for Patient-reported Outcomes in Psoriatic Arthritis: Health Assessment Questionnaire and Pain, Fatigue, and Global Visual Analog Scales

Serum Calprotectin as a Marker for Disease Activity and Severity in Adult-onset Still’s Disease

Patient-derived Joint Counts Are a Potential Alternative for Determining Disease Activity Score
