The Journal of Rheumatology is a monthly international serial edited by Earl D. Silverman featuring research articles on clinical subjects from scientists working in rheumatology and related fields.
Early Arthritis and to Modified Citrullinated Vimentin in Early RA and Very Observations from the RADIUS Registry: A Large Retrospective Multicenter Study in China

Metropolitan City Rheumatoid Arthritis Disease Susceptibility and Dyslipidemia in RA?

Lymphotoxin-α 252 A>G Polymorphism: A Link Between Disease Susceptibility and Dyslipidemia in RA?

Diagnostic Accuracy of ACR/EULAR 2010 Criteria for RA in a 2-Year Cohort

Incidence and Risk Factors for Serious Infection in Patients with RA Treated with TNF Inhibitors: A Report from the Registry of Japanese RA Patients for Longterm Safety

Should Clinicians Start Measuring Flow Mediated Dilation Response in Patients with Systemic Lupus Erythematosus?

Endothelium-dependent But Not Endothelium-independent Flow-mediated Dilation Is Significantly Reduced in Patients with SLE without Vascular Events: A Metaanalysis and Metaregression

Longterm Followup After Tapering MMF During Maintenance Treatment for Proliferative Lupus Nephritis

Quantitative Data for Care of Patients with SLE in Usual Clinical Settings: A Patient Multidimensional HAQ and Physician Estimate of Noninflammatory Symptoms

Late-age Onset SSc

Malignancies in Italian Patients with SSc Positive for Anti-RNA Polymerase III Antibodies

Rehabilitation Treatment in Patients with AS Stabilized with TNF Inhibitor Therapy. A Randomized Controlled Trial

The SPARCC Registry for SpA

Resolution of Inflammation Following Treatment of AS Is Associated with New Bone Formation

Effectiveness and Safety of Etanercept in Patients with PsA in a Canadian Clinical Practice Setting: The REPaReE Trial

High Prevalence of Subclinical Left Ventricular Dysfunction in Patients with PsA

Prevalence of Thyroid Autoimmunity in Patients with SpA

Candidate Genes in Patients with Autoinflammatory Syndrome Resembling TNF Receptor-associated Periodic Syndrome Without Mutations in the TNFReSF1 Gene
