The Crohn's Associated NOD2 3020InsC Frameshift Mutation Does Not Confer Susceptibility to Ankylosing Spondylitis

D'Amato M. The Crohn's associated NOD2 3020InsC frameshift mutation does not confer susceptibility to ankylosing spondylitis. *J Rheumatol* 2002;29:2470–1. In the online version of this work, Drs. Rosa Sorrentino and Sven Pettersson are omitted as authors and should be listed. We regret the omission.
