Online supplement for Gottron Papules and Gottron Sign with Ulceration: A Distinctive Cutaneous Feature in a Subset of Patients with Classic Dermatomyositis and Clinically Amyopathic Dermatomyositis. *The Journal of Rheumatology*. doi:10.3899/jrheum.160024

## **Supplementary Figure 1.**

The interface change in nonulcerated areas was adjacent to the vasculopathy.

## **Supplementary Figure 2.**

A. CADM patient with Gottron papules involving the elbow joint. B. Three weeks later, the Gottron sign has deep ulceration, even with necrotic crust. CADM: clinically amyopathic dermatomyositis.
