Positive Patients with Early RA Activity and Physical Disability in Untreated, Anti-CCP Gene Polymorphisms Are Associated with Disease MBL TNF Blockade in Patients with Active RA Circulating Leptin and Adiponectin Concentrations During Implementation of Z-Scores as an Age- and Sex-independent

From Concomitant RA in Patients with Chronic HBV Infection Anti-CCP Antibodies Distinguish HBV-associated Arthropathy Measures of Anti-CCP Antibodies in Predicting Future RA of RA Synovial Fibroblast Proliferation Hypoxia-induced Abrogation of Contact-dependent Inhibition of RA Synovial Fibroblast Proliferation Comparison of Threshold Cutpoints and Continuous Measures of Anti-CCP Antibodies in Predicting Future RA Anti-CCP Antibodies Distinguish HBV-associated Arthropathy from Concomitant RA in Patients with Chronic HBV Infection Implementation of Z-Scores as an Age- and Sex-independent Parameter for Estimating Joint Space Widths in RA Circulating Leptin and Adiponectin Concentrations During TNF Blockade in Patients with Active RA MBL Gene Polymorphisms Are Associated with Disease Activity and Physical Disability in Untreated, Anti-CCP-Positive Patients with Early RA

Safety and Efficacy of the Selective Costimulation Modulator Abatacept in Patients with RA Receiving Background MTX: A 5-year Extended Phase IIb Study Hidden Cost of RA: Estimating Cost of Comorbid Cardiovascular Disease and Depression Among Patients with RA Autoantibodies to TNF in Patients with RA and SLE Serum Levels of Ficolin-3 (Hakata Antigen) in Patients with SLE Effect of Bosentan on Plasma Markers of Endothelial Cell Activity in Patients with Secondary Pulmonary Hypertension Related to CTD Quality of Life in Patients with SSc Compared to the General Population and Patients with Other Chronic Conditions Surfactant Protein D and KL-6 as Serum Biomarkers of ILD in Patients with Scleroderma CENP-O, a Protein Localized at the Centromere Throughout the Cell Cycle, Is a Novel Target Antigen in SSc Ethnic Influence on Disease Manifestations and Autoantibodies in Chinese-Descent Patients with SSc Rate of Discordant Findings in Bilateral Temporal Artery Biopsy to Diagnose GCA The Immune Response to Autologous Bacteroides in AS Is Characterized by Reduced IL-10 Production Effectiveness, Safety, and Predictors of Good Clinical Response in 1250 Patients Treated with Adalimumab for Active AS Prevalence of Hip Symptoms and Radiographic and Symptomatic Hip OA in African Americans and Caucasians: The Johnston County Osteoarthritis Project
