MAY 2010

From Bedside to Bench: The Role of Anti-Tumor Necrosis Factor Agents in the Management of Immune-Mediated Inflammatory Diseases

Introduction From Bedside to Bench: The Role of Anti-Tumor Necrosis Factor Agents in the Management of Immune-Mediated Inflammatory Diseases

B. Haraoui, A.S. Russell, E.C. Keystone 1

Epidemiology of Immune-Mediated Inflammatory Diseases: Incidence, Prevalence, Natural History, and Comorbidities

H. El-Gabalawy, L.C. Guenther, C.N. Bernstein. 2

Pathophysiology and Pathogenesis of Immune-Mediated Inflammatory Diseases: Commonalities and Differences

P. Rahman, R.D. Inman, H. El-Gabalawy, D.O. Krause. 11

Tumor Necrosis Factor and Anti-Tumor Necrosis Factor Therapies

E.C. Keystone, C.F. Ware 27

Optimizing Use of Tumor Necrosis Factor Inhibitors in the Management of Immune-Mediated Inflammatory Diseases

B. Bressler, B. Haraoui, E.C. Keystone, A. Sette. 40

Anti-Tumor Necrosis Factor Therapies in Immune-Mediated Rheumatic Diseases. Other Observations from the Clinic

A.S. Russell, J.T. Rosenbaum 53
