

# **Supplement 1 – Atlas of sonographic elementary lesions**

**Erosion: cortical break with step down contour defect at the enthesis**

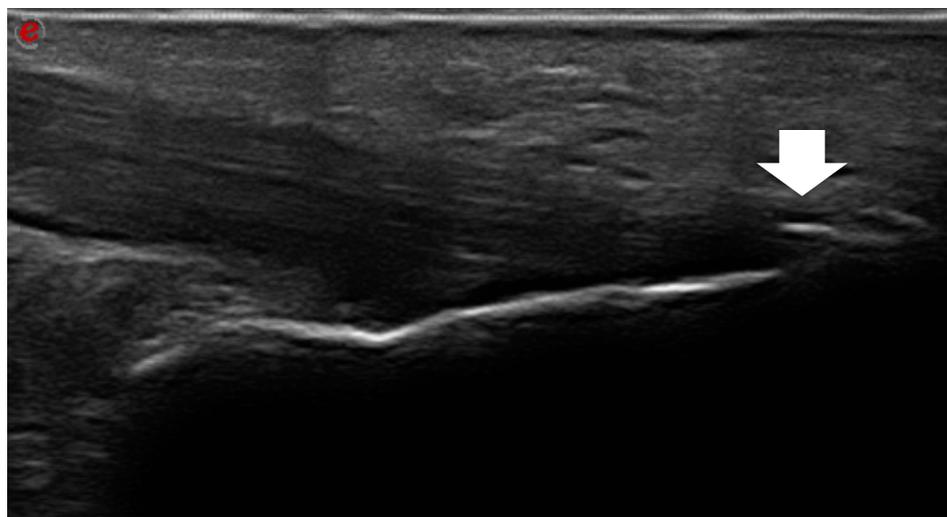

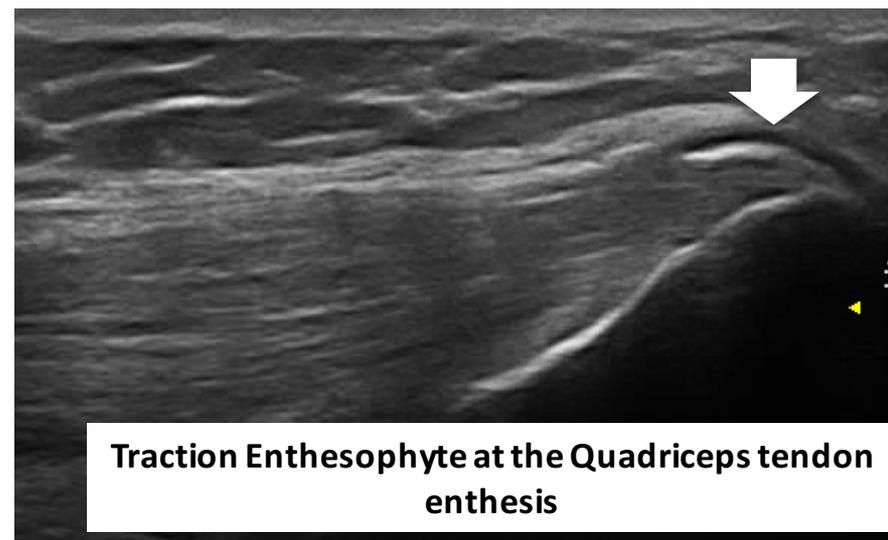

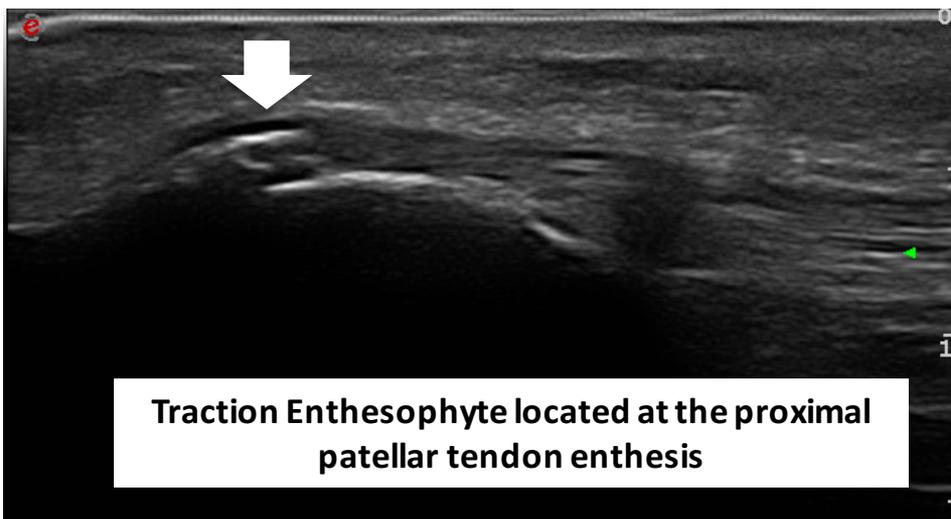

**Erosion along supraspinatus enthesis. Top-Longitudinal view; Bottom – Transverse view**

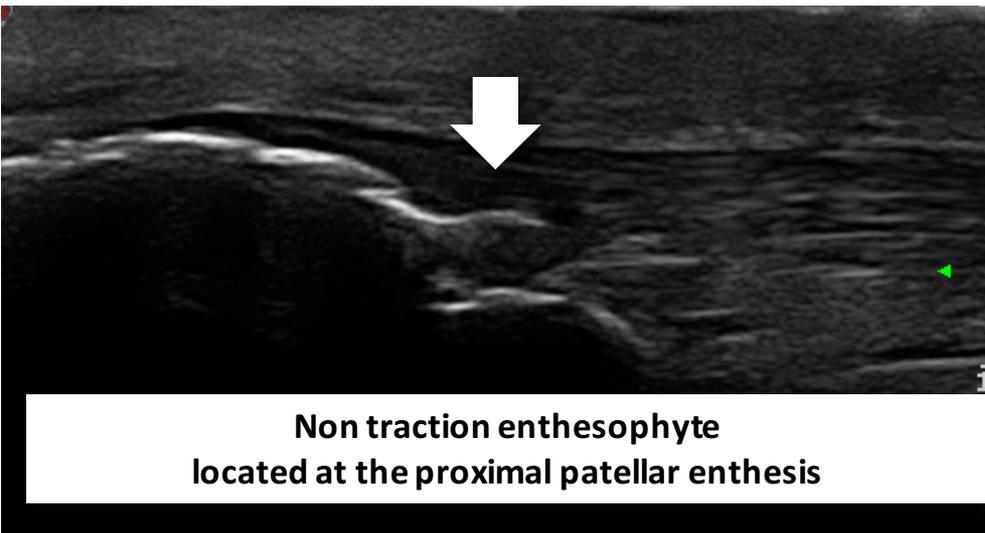

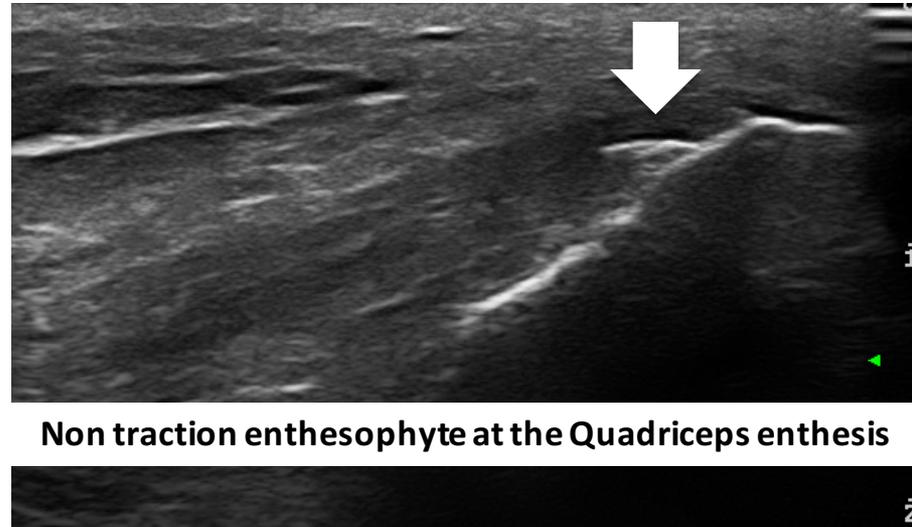

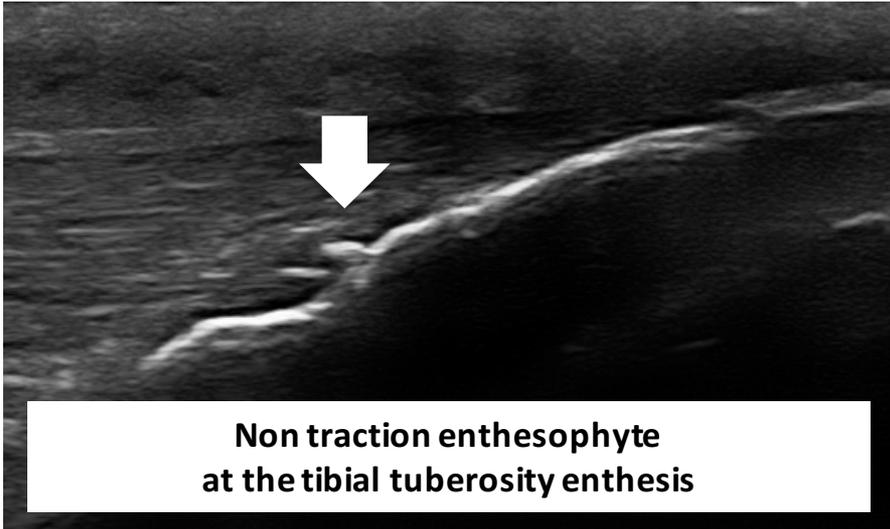

**Erosion at the Achilles tendon enthesis (longitudinal view)**

**Traction Enthesophyte:** A single enthesophyte originating from the most proximal or distal end of the enthesis (at attachment of tendon to bone)

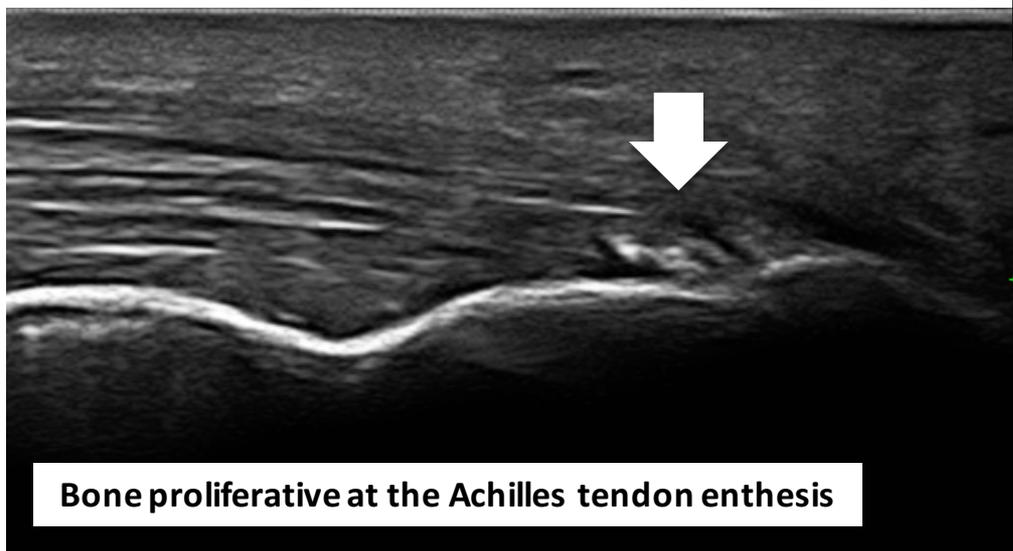

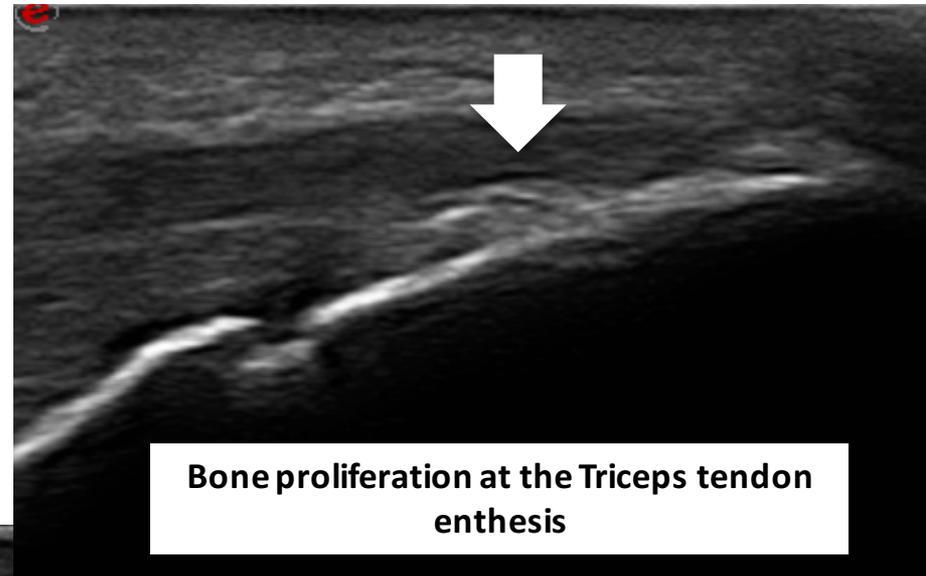

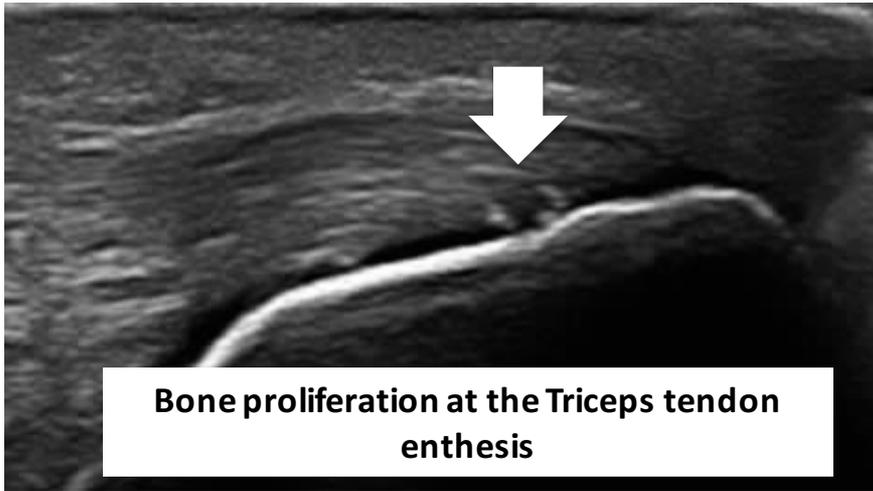

**Traction Enthesophyte at the Achilles tendon enthesis**

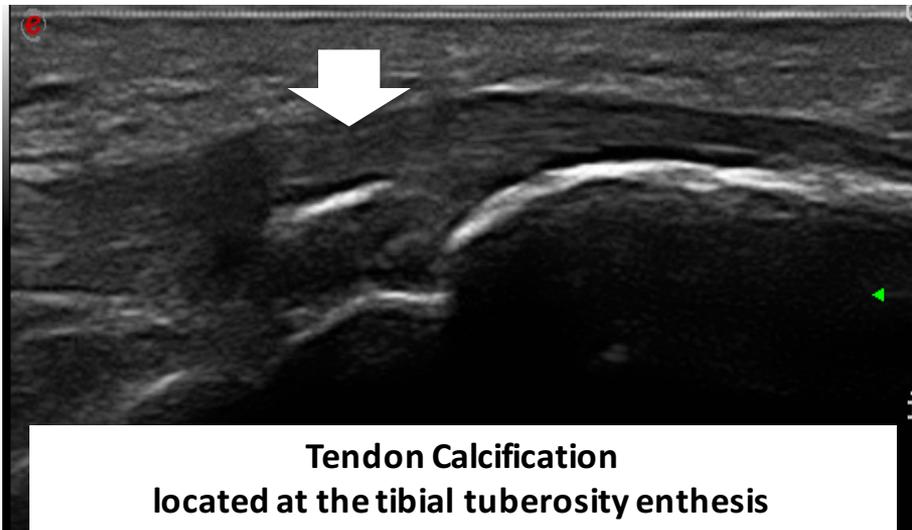

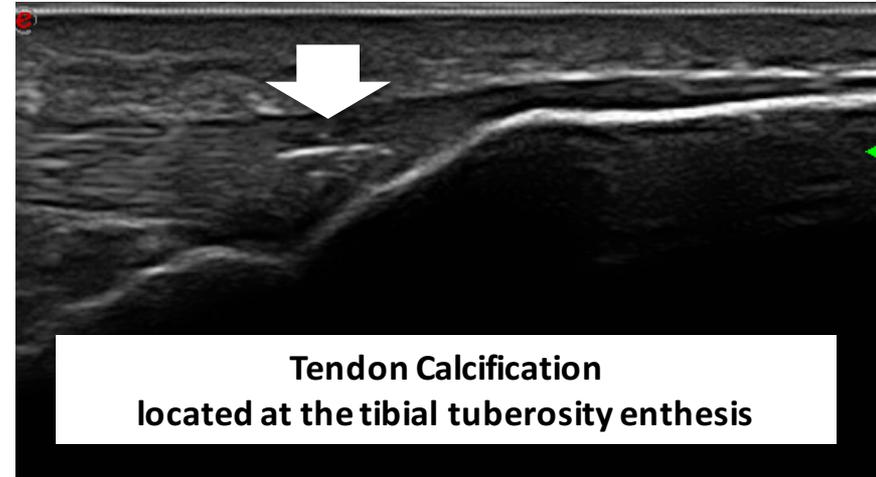

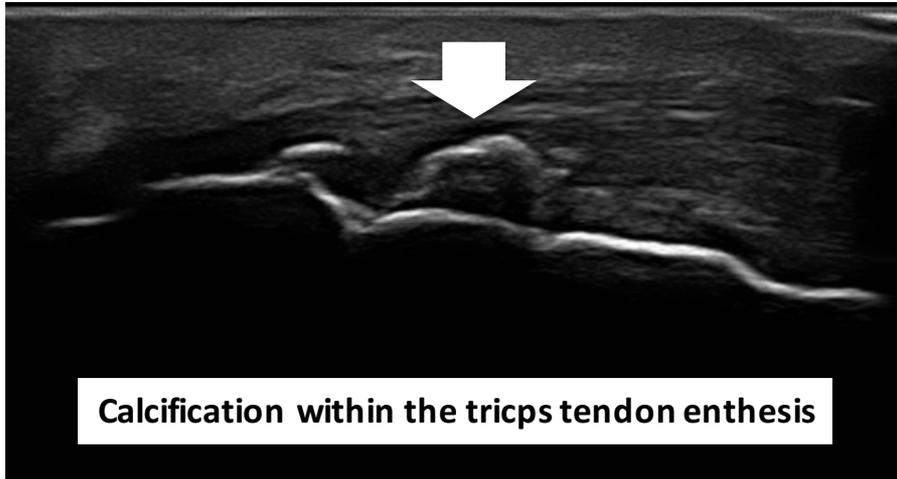

## Non-Traction Enthesophyte: Enthesophyte located along the enthesis

**Bone irregularity:** “Fluffy” hyperechoic bone projections originating from the bone along the enthesis

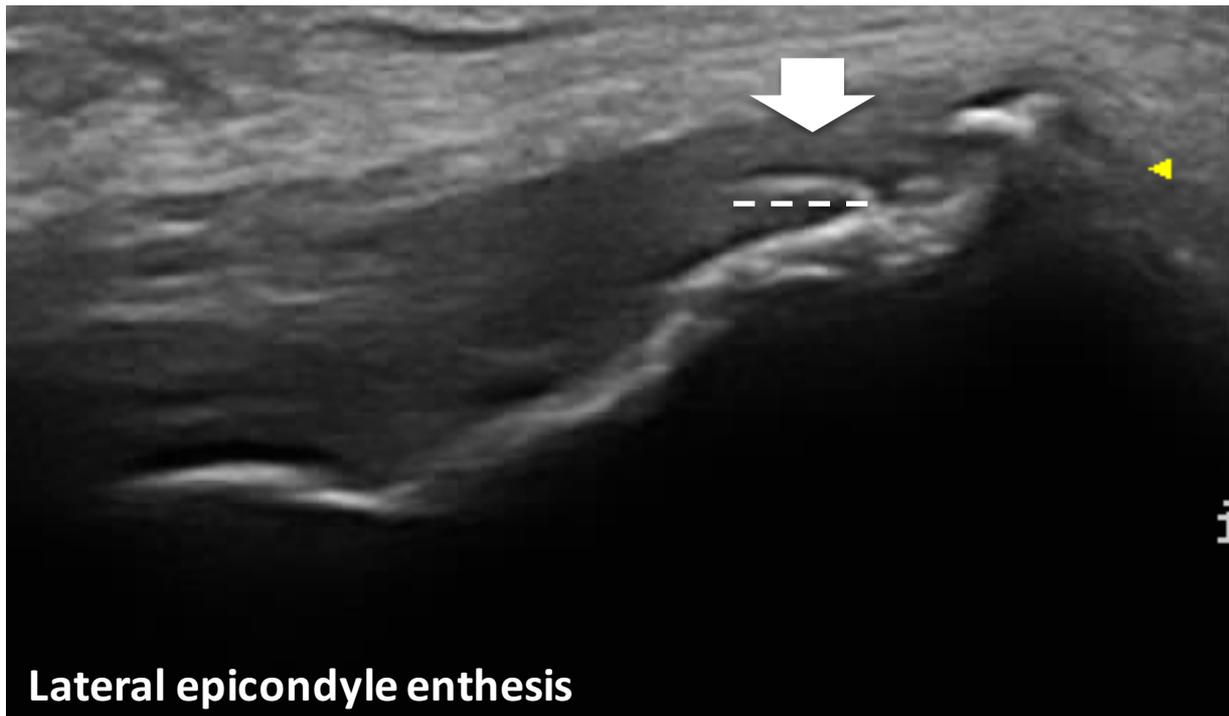

**Calcifications:** Hyperechoic linear structures located within tendon/ligament but with no congruency with bone

## Enthesophyte Grading

- Linear measurement from most proximal to distal end of enthesophyte as parallel as possible to enthesal fibers  
**Grade 1:** < 3 mm length  
**Grade 2:** 3-5 mm length  
**Grade 3:**  $\geq$  5 mm length

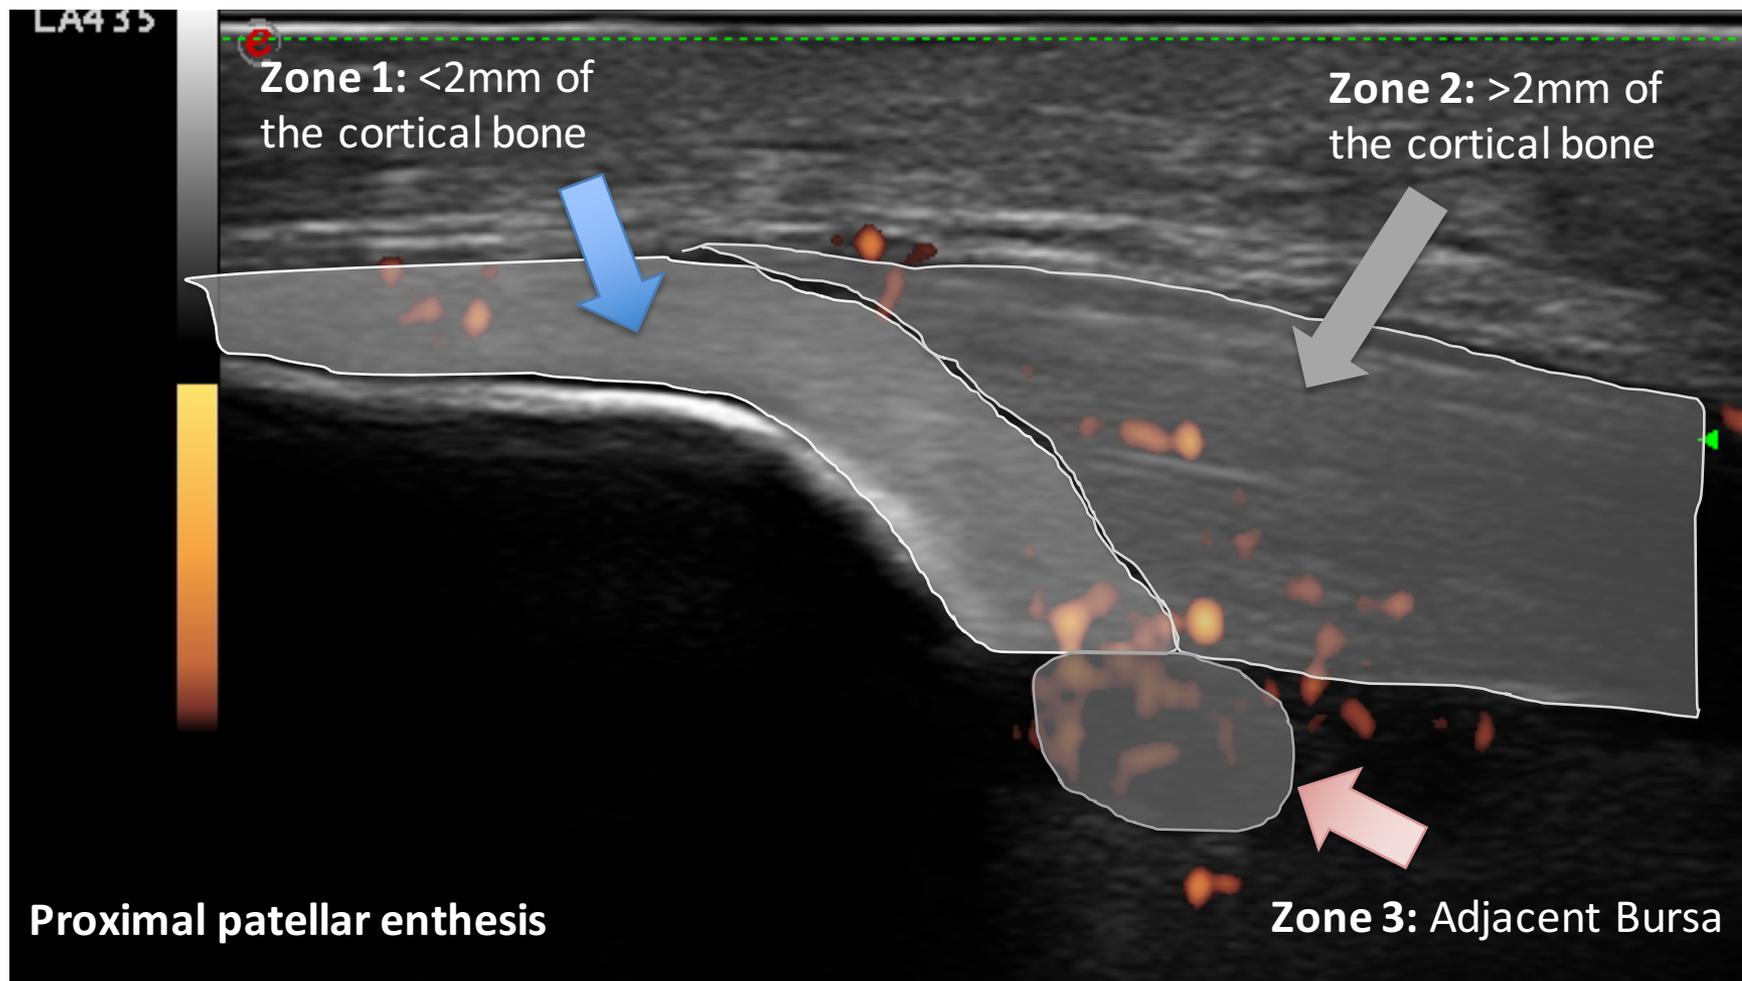

## Doppler signal location:

**Zone 1:** <2mm of the cortical bone

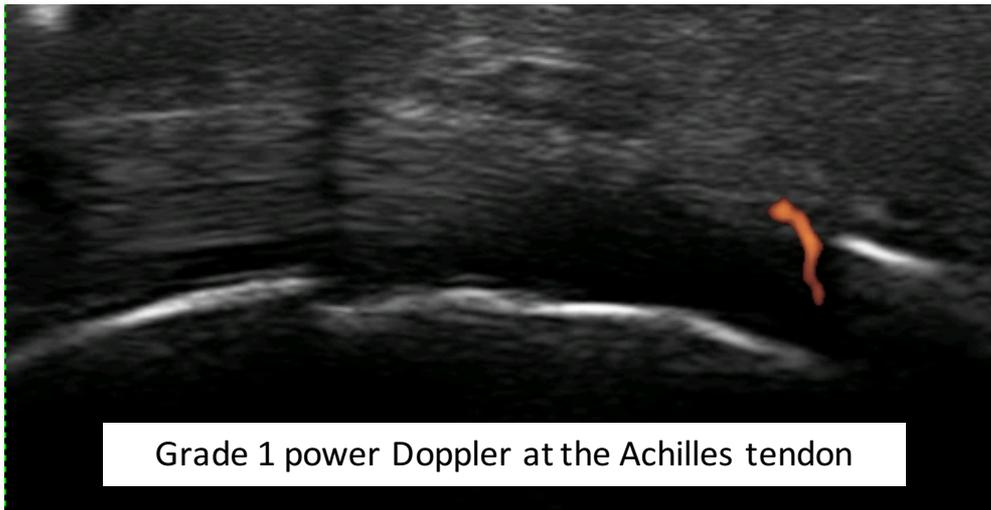

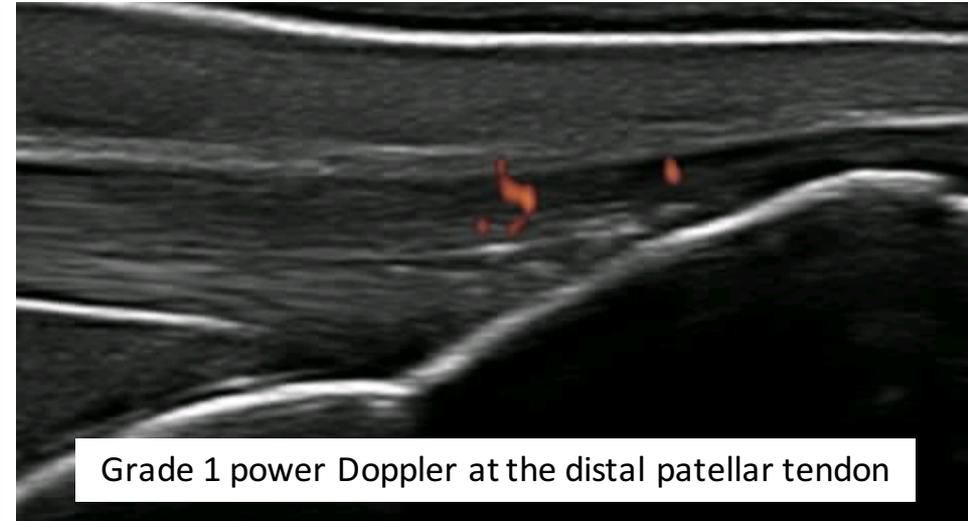

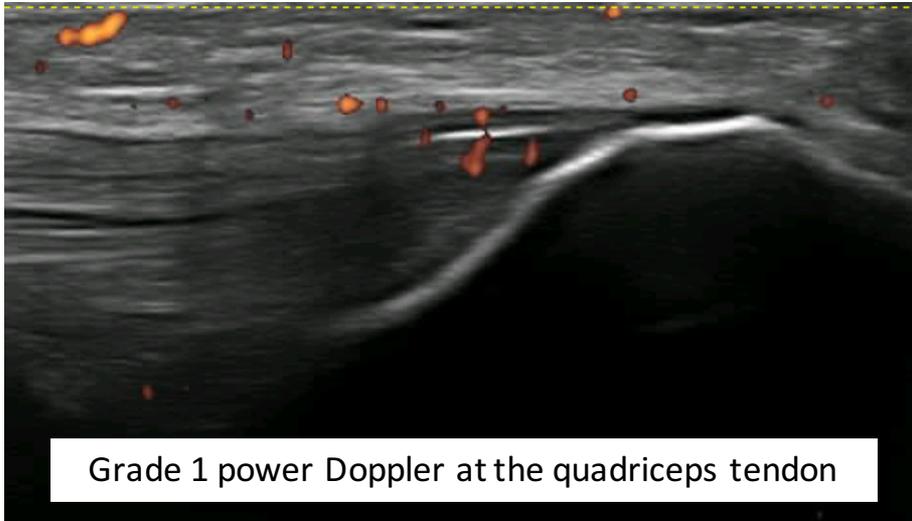

**Zone 2:** >2mm of the cortical bone

**Zone 3:** Within the adjacent bursa

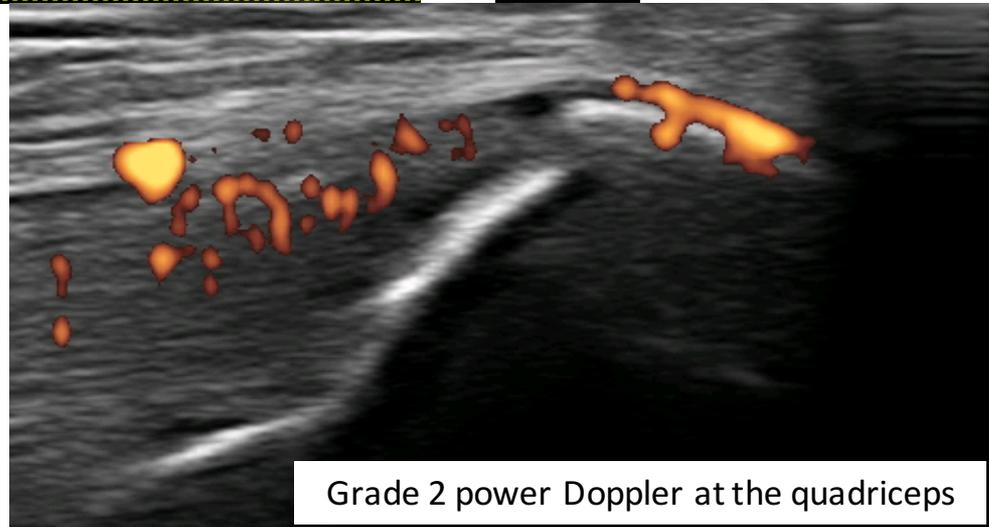

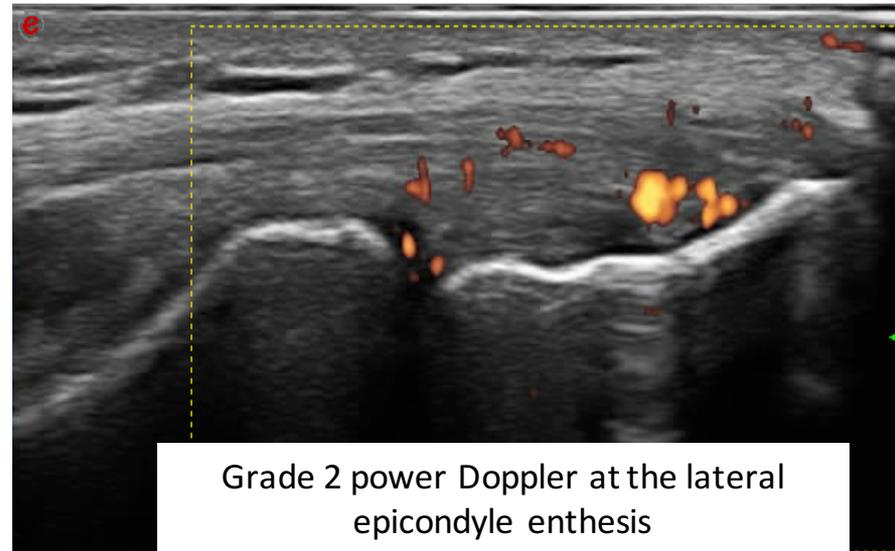

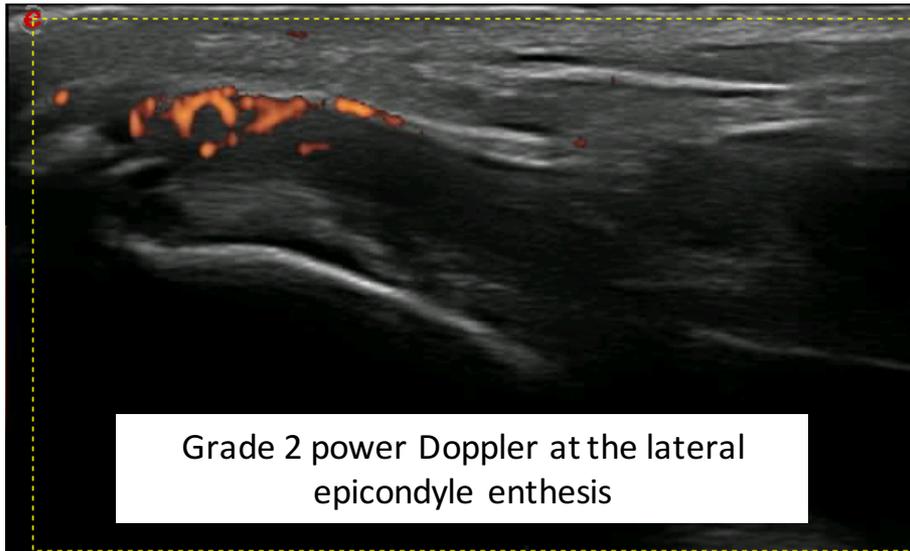

## Doppler signal Intensity Grading

### Grade 1: Up to 3 vessel signals at the enthesis

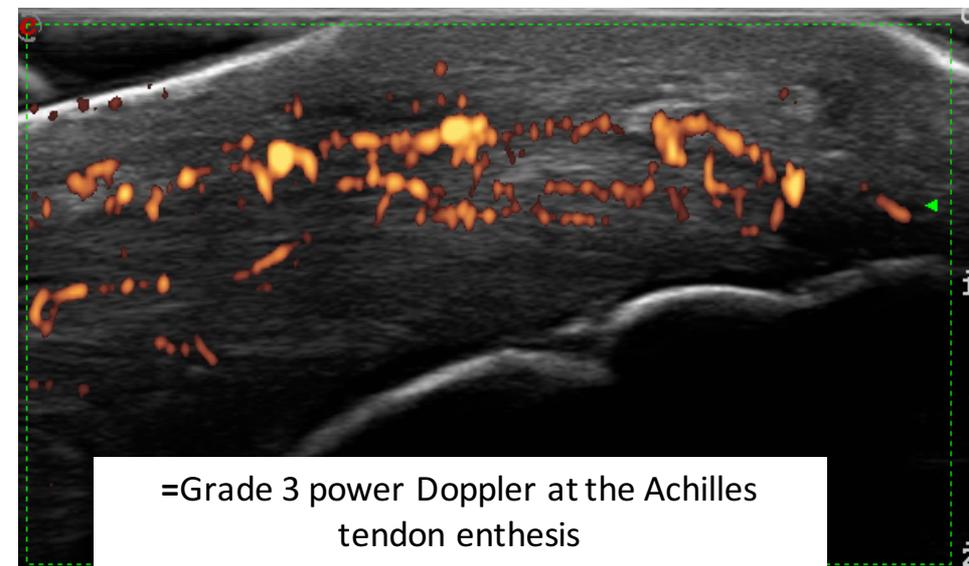

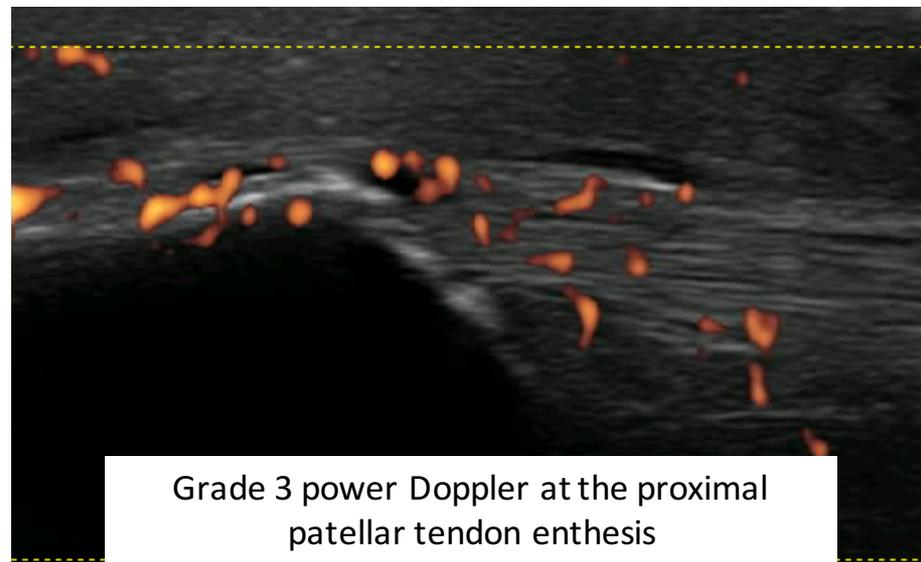

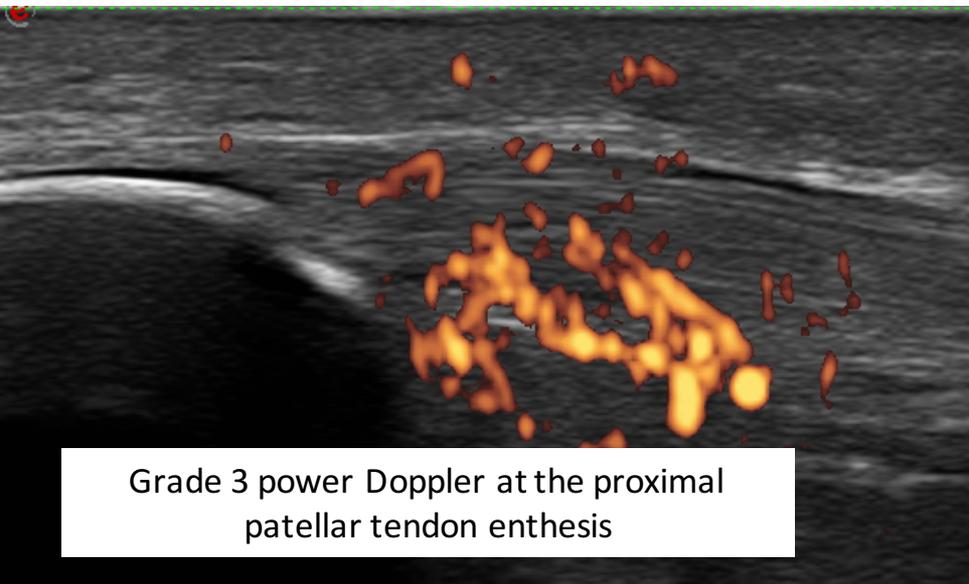

## Doppler signal Intensity Grading

**Grade 2:** Confluent vessels signals in less than half of the area of the enthesis area

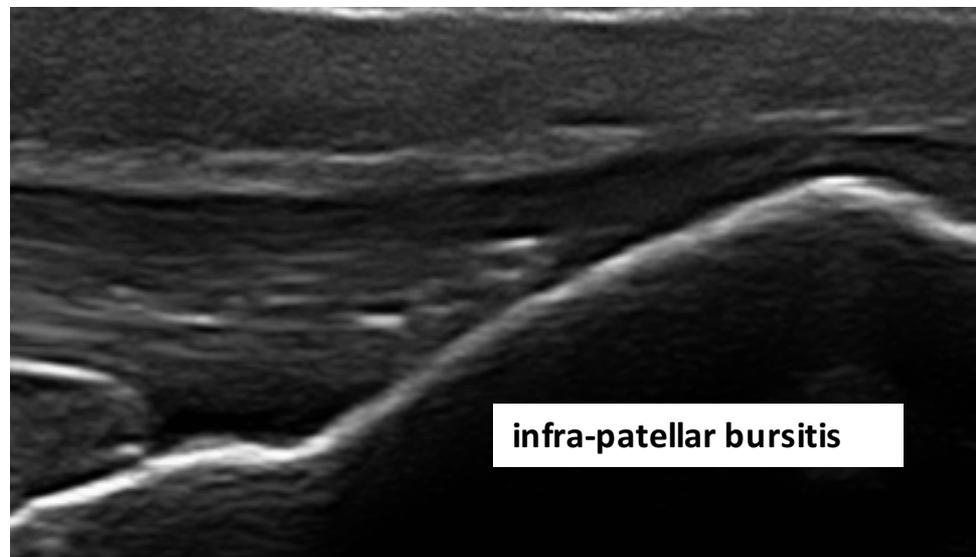

## Doppler signal Intensity Grading

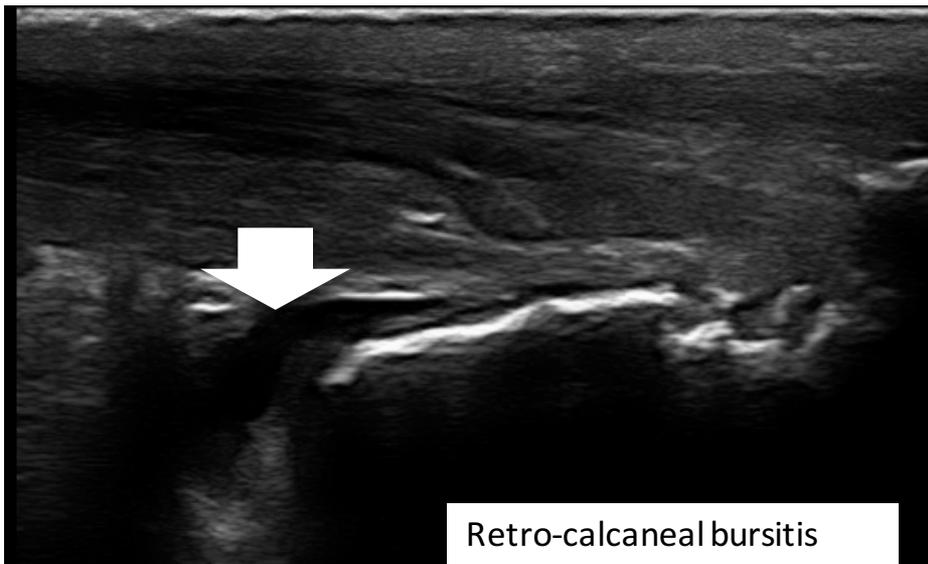

**Grade 3:** Vessel signals in more than half area of the enthesis

**Bursitis**: Hypoechoic area located within known anatomic bursa that is compressible with pressure

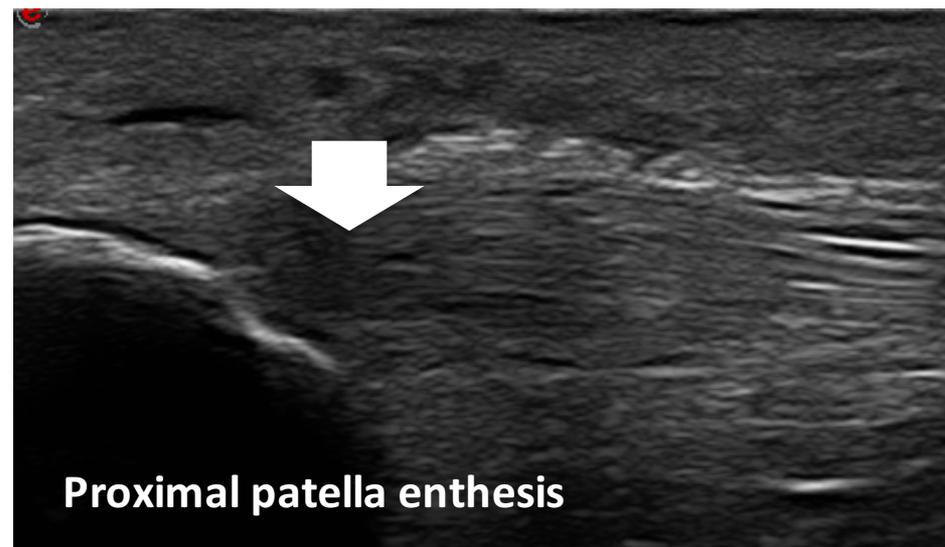

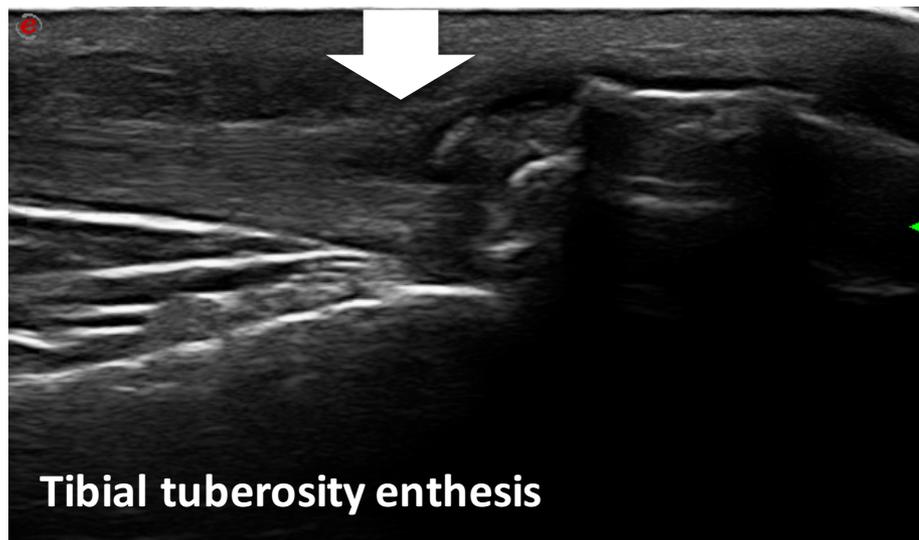

infra-patellar bursitis

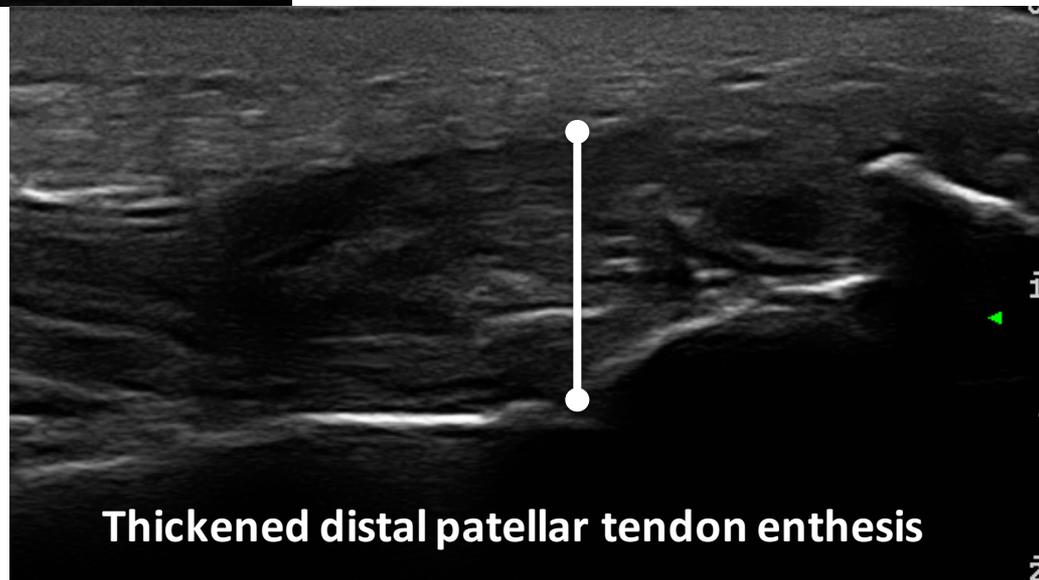

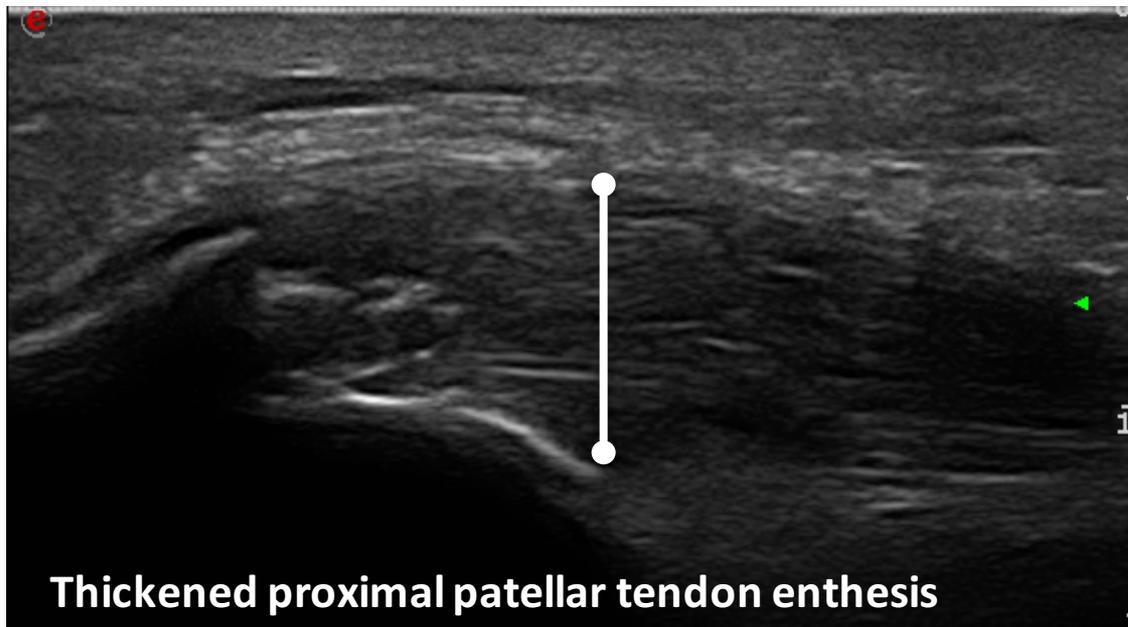

Retro-calcaneal bursitis

**Achilles tendon enthesis**

**Hypoechoogenicity:** Hypoechoic areas (loss of fibrillar pattern) within the tendon/ligament at the enthesis not attributed to anisotropy

**Thickening of the enthesis:** Vertical measurement of enthesis in longitudinal axis at the widest section of enthesis.

<b>Supplementary Table 2A - Frequency of structural enthesal lesions (per of enthesal sites)</b>					
	<b>PsA N (%)</b>	<b>Control N (%)</b>	<b>P value</b>	<b>Sensitivity</b>	<b>Specificity</b>
Quadriceps tendon	15 (30%)	7 (14%)	0.09	0.30	0.86
Proximal patellar ligament	6 (12%)	7 (14%)	0.11	0.12	0.98
